Tuesday, April 14, 2009

Manitoba Pork Marketing's forward contract prices opened lower this morning. US cash market prices opened the week lower, with packers holding back on higher bids despite the shrinking supplies of live hogs. Hog supplies normally tighten by more than 15% from the 1<sup>st</sup> Quarter to the 2<sup>nd</sup>, normally triggering a rally in packer bids. However, meat demand in general is still in question as prices have yet to see any reaction to the tighter hog supplies. Lean Hog futures are expected to come under pressure this week, as they maintain nearly a \$20/cwt premium over the cash market. This is significantly larger than the normal premium of about \$12/cwt that the June contract normally holds at this time of year. Forward contract prices compare favourably to last year's prices for the May – December timeframe.

Canadian delivered soymeal prices opened higher this morning. Yesterday's USDA Export Inspections for soybeans were relatively level with the previous week, with roughly a 3% drop this week. Funds continue to be buyers—but a rising Canadian Dollar is helping to somewhat temper the rallies for the soy complex.

Canadian delivered corn prices opened steady this morning. Rallies for other grains as well as moderate strength for crude oil overnight helped corn close marginally higher. USDA's first Crop Progress Report of the season showed 2% of the total US corn crop planted as of Sunday—the bulk of which is in Texas.
